

Blancco Mobile Device Eraser

ADVANCED DATA ERASURE SOLUTION TO SECURELY AND EFFICIENTLY DISPOSE OF SENSITIVE MOBILE DATA.

Hundreds of millions of mobile devices exist in today's world which hold sensitive personal and company data. Your company smartphone or tablet contains sensitive company data in addition to your own personal texts, photographs and videos. At the end of your device's life, we help you protect both your data and the integrity of your business by securely and efficiently erasing each device. Blancco Mobile Device Eraser can facilitate the safe disposal, reuse or resale of your mobile devices.

- ✓ OS independent. No need for any other operating system to be able to use it
- ✓ Flexible User Interface
- ✓ Customizable erasure pattern
- ✓ Label printing to show IMEI, serial numbers, erasure status, date of erasure and any custom values

Benefits

Fast, Efficient and Fully Supported

Simultaneously erase up to 50 iOS and Android devices at a high speed and in one go, helping your organization to be both cost effective and process efficient. In addition for any troubleshooting questions the user manual doesn't quite cover, our global support team will guide you.

Detailed, Flexible and User-Friendly Software Interface

Keep a close eye on the erasure process as it happens and customize the user interface to suit your needs. Sort devices according to your preference by choosing

serial, erasure status, USB ID and device type, or watch for information on erasure success rate, top 5 processed models, volume handling per hour and percentage rates of processed operating systems.

Comprehensive Post-Erasure Reporting

For a fully transparent audit trail Blancco Mobile Device Eraser produces a digitally-signed report for each processed device, including details such as the device name and model, IMEI code and storage capacity. For maximum customer satisfaction the reports can also be customised with additional fields to suit your exact needs.

Technical specifications

Automation and efficiency

- Operating system independent
- 50 devices can be erased simultaneously (both iOS and Android)
- Detailed statistics visible directly in the UI (Success rate, top 5 processed models, volume handling per hour and percentage rates of processed operating systems)
- Label printing available (with changeable barcode) IMEI, Serial, Erasure status, Date, Custom value

Reporting and auditing

- Full transparency of erasure process ensures a seamless audit trail
- Comprehensive reports include details such as device name and model, IMEI code, and storage capacity
- Unlimited custom fields
- Local storage and connection to Blancco Management Console for automatic sending of reports
